Mountain Weather Forecast

Yorkshire Dales National Park

Forecast valid from 06:00 on Monday 26 Jul 2021 until 23:59 on Tuesday 27 Jul 2021

Forecast Issued on Monday 26 Jul 2021 at 03:46

Confidence: High for a mostly fine day Monday once any early cloud clears, but low for the details of any showers that occur. Also high for an increased shower risk Tuesday, followed by further days of sunshine and showers. Details from Wednesday onwards very low confidence however.

Headline for Monday 26 Jul 2021: Early cloud clearing, with sunny spells following. Chance of heavy showers.

Forecast for Monday 26 Jul 2021

Weather: Some early cloud but a fine day should ensue, with plenty of warm sunshine. Increasing cloud amounts into the afternoon could bring the odd heavy shower, and these could turn thundery with hail in a few places. Most parts remaining dry, however.

Chance of cloud free mountain/hill tops above 600m: 70% at first, best chance in west. Increasing to near 100%, but some transitory cloud possible on highest hills during heavy showers.

Visibility: Views limited and hazy during the morning, especially across eastern hills where cloud will obscure routes above 300m. Some wide ranging views developing as any cloud lifts, but notable reductions expected as any showers move through.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Largely fine day with excellent hill conditions to be found. However the risk of the odd heavy shower will require waterproofs, with a willingness to change plans if showers turn heavy and thundery. Sun protection still recommend, with some strong sunlight expected to develop, as early cloud breaks.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 26 Jul 2021	0mm	0mm	0mm

Forecast for Tuesday 27 Jul 2021

Weather: A fine start, with early sunshine. Cloud thickening from the south during the morning with showers developing. These more widespread than on Monday, and also slow moving, heavy at times and with a chance of thunder. Some brighter or sunny spells remaining likely between showers.

Maximum wind: Westerly 10-15 mph, isolated gusts 30mph near heavy showers.

Chance of cloud free mountain/hill tops above 600m: Near 100%, but chance of transitory cloud on highest hills during heaviest showers.

Visibility: Generally good to very good away from showers, but poor views developing whenever showers move through.

Temperature: **Valleys:** Plus 14 Celsius becoming Plus 22 Celsius
At 600m: Plus 10 Celsius becoming Plus 14 Celsius
Freezing level: Above summits.
